## MASON CAMP SURE OF RAILROAD LINE

Nevada Copper Belt Railway Company to Build From Wabuska to Mines.

CONTRACTS ARE LET FOR EQUIPMENT FRIDAY

Grading Contract Also Entered Into and Dirt Will Fly in Few Days.

Although every possible effort was made Friday evening to keep the matter from reaching the general public, it leaked out that a contract had been let by the Nevada Copper Belt Railway company for the complete equipment for the new road leading from Wabuska to the mines of the Mason or Yerington listrict of Lyon county, Nevada. The Nevada Copper Belt is a subsidiary or ganization to the Nevada Donglas Copper company, which latter company guarantees the bonds of the railroad er ganization, the Nevada Donglas company owning the Ludwig and the Douglas copper properties.

It was assertained vesterday that the contract had been let to the latter that the contract had been let to the latter company assertained vesterday that the contract had been let to the latter that the contract had been let to the latter company assertained vesterday that the contract had been let to the latter company and a real less than three miles are total of \$14.000.000.

ganization, the Nevada Donglas company owning the Ludwig and the Douglas copper properties.

It was ascertained vesterday that the contract had been let to the F. C. Richmond company for seventy one carloads of railroad equipment such as rails and accessories, ties and similar items. Following the letting of this contract, or following the letting of this contract, or following the announcement that the contract had been let, it was also ascertained that the contract for grading the read likewise had been provided for, and nothing now stands in the way of constructing the line.

When asked vesterday by the Tribune in regard to the matter, A. J. Orem of Boston stated that beth contracts had been let, and that work would be started inside of a few days. The company had intended to keep these matters from being published for the reason that there is one or two small items that still stand in the way of a full announcement in regard to the plans at the Mason camp.

The rails and accessories ordered are understood to be now in Iowa, and as the contract calls for immediate delivery, it is expected that the consignment will be moving west inside of a few contract calls for insmediate delivery.

the contract calls for immediate deliv-cry, it is expected that the consignment will be moving west inside of a few lays. The equipment is sufficient to lay fourteen miles of road, but just which route of the several surveyed routes will be selected remains to be seen later on. The railroad company also has placed an order for a locomotive which will in all probability be utilized in construct-ing the new line.

This by all odds is one of the most important announcements ever made for he Mason camp, and it shows the formula of the mason camp, and it shows the first the first the mason camp. he Muson camp, and it shows that the nine owners are to get a railroad at last, something essential to their present last, something essential to their present and future prosperity and something that has been prayed for continually shring the past four years. There never was any doubt of a railroad entering the camp, the only question being when. The next move of the Nevada Douglas Copper company will be to provide a smelting plant for the camp, an accessory that has proceeded far towards straighly reaching into the heart of the district there can be little delay looked for in smelter installation, for so great are the developed resources of the Nevada Douglas, Mason Valley and other troperties in the camp that a complete line of reduction plants is timely and recessary.

### SALT LAKE SHOULD ABVERTISE THE CITY =

Wistle expressing absolute faith in Sait ake City as a future incropolis, guarded as its future is by some of the great place of the world. A. J. Dutton, a well-grown mining man of Ouray, Colo, befores that Sait Lake should take on more of that character of loyalty that has been each a valuable asset to Denver. Mr. Dutton is a frequent visitor to this city, and be knows the mineral possibilities and certainties of Utah in a thorough Cambertand Daly West. Dayles Daly and be believes that in time Sait Lake will pass Denver, but it will lake the hustle and boost of Denver to arrang this about.

The same time I do not believe that they have here, and they going they are fall you that if the Great Sait Lake could import a couple of hundred men from Denver, the men who have made that city what it is to day. They would make fortunes them is vec, while they would benefit everyone at the same time. I do not believe that Self Lakets try to let the world know what they have here, and the people of the east are beginning to resize that this is more than a little Mormon town. To say nothing about your mines, let me fell you that if the Great Sait Lake was at benefit which will be forced by a balf-infillion population. The lake is going to belp Sait Lake City gain that point, but the people here might tempine to bring about this result in a fay more expeditious manner than at present employed.

### PIOCHE METALS WINZE FOLLOWING RICH ORE

Sait Lakers interested in the Pioche Metals Mining company of Pioche releved some splendid news Friday when assay rejurns on the ore now being opened by the winze were available. The ore assayed 14.5 ounces silver: \$1.50 gold; \$2.4 per cent lead, and 16.22 per cent coper values were a decided surprise to the local officials of the company, and it is taken as a very favorable item, for, even if such values do not continue faithfully, it demonstrates the mineralizing powers of the agencies that have been at work mapping out the metal wealth of this property.

The winze is being driven from the 100-feet level of the mine, and when last heard from is down about fifty feet. The ore as above assayed is six inches in extent, and considerable interest naturally follows the work of sinking to better depth on this small but fine showing. The Floche Metals property is a Sait Lake proposition.

### UTAH CON. TRAMWAY IS FAST ASSUMING SHAPE

The management of the Utah Consolidated company at Bingham is making splendid time in the preparation of the new acrial tramway. The first thing that had to be done was the construction of the road over the mountains across which the tram will extend, and this work has been completed. The foundations for the loading station at the mine are being rushed to completion, and the concrete work for the foundations of the many towers is getting along smoothly. Material is being delivered to the various points where it belongs, and everything tooks as if the tram will be in shape for operations by the time called for.

### Ore and Bullion.

The ore and bullion report for Friday, given by McCornick & Co., was as follows: Ore received, \$60,000; bullion shipped, \$50,000; gold bars purchased, \$56,000; total, \$167,000.

## COBALT THE WONDER OF THE MINING AGE

Camp Producing One-Seventh of Silver Output of the Entire World.

That the world has not lacked a cane past four years is due in a large measure to the wonderful development of the Cobalt camp of Canada. The camp when first discovered gave promise of being little more than a country of 326,840,60 extremely narrow but very rich silver veins which the majority of people be-

vada.

From an area less than three miles Bi Jek square a total of \$14,000,000 has been paid out in the form of dividends, the total gross production, including the Carisa estimated output for 1909 at \$14,000, C Talis 000, being \$35,172,250. In 1904 the Col Consequently of the color of the

00. being \$35,172,250. in ross production in silver : 136,217; in 1905, \$1,485,57 3,573,908; in 1907, \$6,476,5 9,500,000. New York Mining S James A. Pollock & Co.	mounte 0; in 1	d to 1906,	Col Con Con Mer Cr Pt	1.1

## Mining Notes.

Queen Irepiration

John Dern is back from a trip into R. C. Gemmel, general superintendent of the Utah Copper company, was at the mine in Bingham yesterday. E. J. Raddatz, general manager of the Tintic Standard Mining company, has re-turned from the property.

C. C. Griggs, superintendent of the May Day and Uncle Sam companies, was in the city yesterday en route to Eureka. Mr. Griggs has been on a vacation to the Northwest.

Metal Market.

The consolidated Mercur Gold Mines company on Friday received from the lands of the mine management the gold bullon produced during the month of July The gold was valued at close to Silver, 12c; lead, \$4.40; copper, 12 15-1sc office.

Glory Holes Provide Ample Food for Milling Plant McGill-M. Herman, Walden & Burnett, of Company. Rhyolite—The Crescent.
Ploche—Pioche Drug Co.
Callente—John Shier, Thomas Him

DEBTS BEING CUT

There is no change in the local market, the total sales for Friday amounting to 68,784 shares, the market value being 328,840.60. The following were the closing unlisted and listed stock transactions:

Facilities, Which Will Be Facilities, Which Will Be Increased.

> The Rhyolite Herald has a timely acount of the condition of the Montgomery Shoshone Consolidated property at Bullfreg, which follows:

The net profits for the first six months of the year 1909 were \$126,500. Bid. |Asked. | Bid. |Asked.

ed from the 200, 300, 400 and 500 levels.

The glory hole has been broken down to the 300 level with 100 feet or more of broken ore in the pit. The glory hole is 250 feet long, 175 feet wide, with the ore exposed on three sides. The new ore body opened on the 300 is on the footwall side, presumably a continuation of the rhyolite ore body opened on the west side of the glory hole, but a separate body from the tale deposit.

On the 300, the rhyolite ore is about 200 feet distant, in a southwesterly direction from the tale in the glory hole, with a width of about 60 feet of milling ore now exposed and the end not in sight.

Crosscutting from an old stope between the 300 and 400 levels has revealed an immense ore body which is now being broken for the mill.

# ARE BEING FINANCED

Another Item Showing That Copper Consumption Will Be Increased Soon.

A very important element in the pros perity of the copper and the electrical manufacturing industries is the con-DOWN IN GOOD TIME struction of new trolley railroads and the enlargement or extension of existing lines. It is needless to say that operations of this character have, on the whole, been at a standstill since the midsummer of 1907, when, owing to the congestion in the market for such securities, it became practically an impossibility to market all the an impossibility to market all the bonds based upon properties of this kind. Since the beginning of the pres-ent summer, however, there has been a better feeling among the bankers who actively interest themselves in financing such promotions. It is understood that a number of large bond issues based upon street and activities electric railways, including

months of the year 1909 were \$126,500.

tepresenting about 50 per cent of the gross receipts of the milling operations. Since John G. Kirchen took charge about \$225,000 of the indebtedness of the company has been wiped out, and about \$50,000 expended in improvements. The present net production is 10 per cent of the par value and more than 29 per cent on the market value of the stock, the par value and more than 29 per cent on the market value of the stock, the par value being \$5 cents per share. The output is limited only by the milling facilities, which shortly will be increased to one ton treated.

Outside investors are beginning to appreciate the importance of the improved conditions, as evidenced by the sudden sput in the price of the stock, which is of no particular interest for tone per month, eventually must be increased to make room for the underground workings, it having been proved to make room for the underground workings, it having been proved to make room for the underground workings, it having been proved to make room for the underground workings, it having been proved to make room for the underground workings, it having been proved to make room for the underground workings, it having been proved to make room for the underground workings, it having been proved to make room for the underground workings, was started this week Tuesday, and the work done on the levels day, and the work done on the levels day, and the work done on the levels opened. Ora for the mill is being holds were as follows:

Tintic Ore Shipments

FUFEKA, Aug. 27.—Tintic ore shipments, by carloads, for the week ending today were as follows:

Centennial Eureka

Out 19 per cent on the market value of the thought and the provent in the mine with 200 feet of stoping ground opened. Ora for the mill is being holds were as follows:

The glory hole has been broken down in the provent in the p representing about 50 per cent of the interurban electric railways, including gross receipts of the milling operations, some new enterprises of that character,

Eagle and Blue Bell Chief Consolidated Uncle Sam East Tintic Development fron Blossom ragen fron Ajax

One hundred and seventy-five carloads f ore were shipped to the Tintic smelt-

### GREAT CAREY ACT LAND OPENING Cassia County Comes into the Lime light. To the Poblic:

To the Public:

On Monday, September 29, at ten o'clock a m., 38,000 first-class selected acres will be offered for sale in the celebrated Goose Creek valley, known as the Twin Falls Oakley project. This immense acreage is a Carey act project and will be sold under Carey act rules. The drawing will be under the supervision of the state land board of Idahe. Everyone who is acquainted with the land situation in Idaho knows that the finest body of agricultural and norticultural land in all Idaho is in this favored valley, and the acres offered in the Oakley project are the choicest acres in the valley.

The price, including water right, is \$65.50 per acre; \$3.25 cash per acre at time of filing; the balance in eleven annual payments, 6 per cent interest, no interest until water is ready for delivery. Second payment is not due until one year after water is delivered.

J. S. and W. S. Kuhn of Pittsburg, Pa., are financing the genternise.

J. S. and W. S. Kuhn of Pittsburg, P.a., are financing the enterprise, which is sufficient guarantee of its success. Management will be the same as the Twin Falls North Side Land and Water company, the Twin Falls Salmon River Land and Water company, the Idaho Southern Railway company, now operating a railroad from Gooding to Wendell and Jerome, and under construction to Hillsdale, Milner and on to Oakley. Send for booklet. Address all communications to Twin Falls Oakley Land & Water company, Milner, Idaho. S. and W. S. Kuhn of Pitts
